

Akram F. Rifai

Cybersecurity Engineer | Penetration Tester

Amman, Jordan | +962 79 952 0930 | akram.firas.rifai@gmail.com | [linkedin.com/in/akram-rifai](https://www.linkedin.com/in/akram-rifai) | akram-rifai.netlify.app

PROFESSIONAL SUMMARY

Cybersecurity graduate with three internships in penetration testing, vulnerability assessment, and security operations. Experienced in testing web applications and servers, administering Active Directory, automating tasks with Bash and Python, and producing clear technical reports for remediation. Strong foundation in network security, ethical hacking, and compliance, with hands-on certifications including CEH and CCNA. Seeking a Cybersecurity Engineer or Penetration Tester role to apply technical and analytical skills toward strengthening organizational security posture.

CORE COMPETENCIES

Penetration Testing | Vulnerability Assessment | Web Application Security | Network Security | Network Traffic Analysis | Port & Service Scanning | Active Directory Administration | Group Policy Management | Ethical Hacking | Digital Forensics | Information Security | Security Policy & Compliance | Vulnerability Reporting | Risk Assessment & Mitigation | Security Auditing | Bug Bounty Research | Security Automation | Linux Security | IT Operations Support

TECHNICAL SKILLS

Security Tools & Practices: Penetration Testing, Vulnerability Assessment, Active Directory, Group Policy, Digital Forensics, Ethical Hacking, Security Policy Review, Bug Bounty Programs

Security Testing Tools: Burp Suite, Nmap, Wireshark, Kali Linux

Programming & Scripting: Python, Java, Bash Scripting, JavaScript, HTML, CSS

Networking: Cisco CCNA (Routing & Switching, Enterprise Networking, Security & Automation)

Productivity Tools: Microsoft Word, Excel, PowerPoint, Outlook, Access

PROFESSIONAL EXPERIENCE

Penetration Tester Intern — Green Circle for Cyber Security, Amman, Jordan *March 2024 – September 2024*

- Performed penetration testing and vulnerability assessments on websites and servers using Burp Suite, Nmap, and Wireshark, identifying security vulnerabilities and potential threats across client infrastructure.
- Authored detailed technical security reports outlining risk findings, remediation steps, and recommendations to strengthen security posture.
- Reviewed and updated organizational security policies to align with industry best practices and compliance standards.
- Administered Active Directory, including user and group management, to enforce secure access control and support IT operations.

Penetration Tester Intern — Estarta Solutions, *2023 – 2024 (3 months)*

- Developed and executed Bash scripts within a Kali Linux environment to automate security testing tasks, improving efficiency of vulnerability assessment workflows.
- Participated in bug bounty programs, identifying and reporting vulnerabilities in web applications and systems to improve application security.

Software Developer Intern — Estarta Solutions, *2023 (3 months)*

- Developed a responsive web application using JavaScript, HTML, and CSS, focusing on secure, user-friendly interface design.

Data Entry Intern — Universe-Path Academy, *February 2021 – July 2024*

- Entered and maintained accurate records in spreadsheets, ensuring data consistency and integrity.
- Verified data accuracy through systematic quality checks.

EDUCATION

Bachelor of Science in Cybersecurity

2024

Al-Zaytoonah University of Jordan — Amman, Jordan

CERTIFICATIONS & TRAINING

- Certified Ethical Hacker (CEH) — EC-Council, October 2025
- Penetration Testing Professional (PTP) — Cyber Shield (JODDB), November 2023
- Digital Forensics — Cyber Shield (JODDB), October 2023
- Ethical Hacking — Cyber Shield (JODDB), October 2023
- Cyber Security Attack Techniques — Edraak, January 2024
- Introduction to Cyber Security — Edraak, January 2024
- Protect Systems from Penetrations — Edraak, January 2024
- Cyber Security Operations Fundamentals — Cisco, June 2022
- Introduction to Cybersecurity — Cisco, April 2022
- CCNA: Switching, Routing, and Wireless Essentials — Cisco, November 2022
- CCNA: Enterprise Networking, Security, and Automation — Cisco, December 2022
